RE: Request for QA/QC Review of San Juan Harbor Navigation Project Testing Data

Attached please find additional data submitted by USACE-Jacksonville District's contractor in support of the referenced project. According to USACE, triplicate analyses were conducted using pretest tissue samples. Please review the attached data and provide us with your Division's assessment of the data quality using the guidance outlined in the Region 2 Regional Implementation Manual. If you have any questions, please do not hesitate to contact me at x3799. Thank you very much for your support.
